

IRE ELiT and Grand Pharmaceutical (China) Co., Ltd. announce partnership for Galli Eo (Gallium-68 generator) distribution in China

Fleurus (Belgium) and Wuhan (China), 06 June 2024, – IRE ELiT, a leading global player in the field of radiopharmaceuticals, is pleased to announce the signing of a distribution agreement with **Grand Pharmaceutical (China) Co., Ltd.** ("Grand Pharma", and its subsidiary Chengdu Purevalley Medical Technology Co., Ltd.), a major pharmaceutical conglomerate, for the distribution of its **Galli Eo** (Gallium-68 generator) in China. This strategic partnership underscores IRE ELiT's commitment to expanding its footprint in one of the most dynamic and rapidly growing markets for radiopharmaceuticals.

China, with its significant advancements in healthcare and an increasing demand for cutting-edge medical technologies, represents a pivotal market for IRE ELiT. The Galli Eo generator, known for its performance and reliability, will be instrumental in enhancing diagnostic capabilities and improving patient outcomes across the country.

"The professionalism and radiopharmaceutical expertise of the Grand Pharma team combined with the perfect integration of our respective products in the service of Chinese patients makes this partnership particularly relevant. We are very happy and proud to have Grand Pharma as our distributor of our Gallium-68 generator in China," said Jean Bonnet, Head of Strategy at IRE ELIT. "China's healthcare sector is evolving at an unprecedented pace, and our partnership with Grand Pharma will enable us to bring our innovative solutions to a broader audience. Together, we are committed to advancing the field of nuclear medicine and delivering high-quality care to patients."

Grand Pharma (and its subsidiary Chengdu Purevalley Medical Technology Co., Ltd.) brings extensive expertise and a robust distribution network, ensuring that the Galli Eo generator will reach medical hospitals and facilities across China efficiently. This collaboration marks a significant milestone for both companies, leveraging their strengths to meet the growing demand for advanced Ga-68 radiopharmaceuticals in the region.
